PROJECTS

Cinema & Sip — [Repo](#) | [Deployed](#)

Tools/Languages: JavaScript, jQuery, HTML, CSS, Bulma, TMDB/Cocktail DB APIs

Cinema & Sip is a web application that generates a suggested pairing of a movie and beverage based on a user selecting a movie genre and alcohol type. Our project utilizes two consistently updated APIs to ensure relevant and new results for each use.

Hospital Management System — [Repo](#) | [Deployed](#)

Tools/Languages: Node.js, MySQL, Sequelize, Express, JavaScript, HTML, Bootstrap, CSS

A Hospital Management System that helps manage the information related to health care and aids in the job completion of health care providers effectively. We used Node.js and express.js to create the Restful API and used MySQL and Sequelize for the database.

Stack Up— [Repo](#) | [Deployed](#)

Tools/Languages: React, Node.js, MongoDB, Mongoose, JWT, Express, JavaScript, GraphQL, CSS

An application where developers can post their projects to receive real, honest feedback from community members and network with like-minded individuals. We used React for the front end of the application, Mongoose ODM to connect to the Express framework, and the data is queried and mutated through GraphQL and stored inside the MongoDB instance.

EXPERIENCE

The Stand LLC | Irvine, CA — General Manager 2020 - 2022

- Responsible for the restaurant's weekly & monthly financial objectives, including but not exclusive to: labor under 30%, and COGs under 24% of gross revenue.
- Daily monitoring of restaurant operations to verify food quality and preparation efficiency meet company standards by following the food safety guidelines regulated by the California Dept. of Health.

Pescatore Seafood Co | New York, NY — VP Operations 2019 - 2020

- Supervised day-to-day operations of production, distribution, and retail storefront.
- Developed and implemented a daily digital log including key updates, progress of projects, and issue logging, which proved to be essential to provide updates to owners and increase profit margins by 4%.
- Responsible for employee onboarding, testing and training, Microsoft Teams resource management to increase employee engagements, and IT support for troubleshooting technologies such as POS systems, third party tablets, and various softwares.

Nolita Natural Inc | New York, NY — Head of Production 2015 - 2019

- Assisted with developing the foundations of the company by conducting research on regulatory requirements related to starting a food business which included securing licensing/permits/insurance, production facilities, and that products adhere to FDA regulation.
- Tasked with growing the production side of the business by developing product recipes, scaling production to meet customer demand, and creating & implementing company policy & procedure documents (SOP, GMP, HACCP) utilizing Google Workspace.
